BC – How to configure Active Directory Authentication

Oude Oeverstraat 120-4 6811 JZ Arnhem The Netherlands t: +31(0) 88 1221 800 f: +31(0) 88 1221 899 www.rsconnect.net info@rsconnect.net

How to configure Active Directory Authentication within the Business Connector

This How-To guide explains how to configure Active Directory support for the Business Connector.

If the CUCM is configured to accept the Windows login name as the userID during EM authentication, then BC requires and additional application user to be created in CUCM.

For additional information please contact support@rsconnect.net

c)

Required CUCM configuration

This step explains how to configure one generic Application User in CUCM with permissions to allow 3rd party non-Cisco applications like the Business Connector to login users via the Extension Mobility API.

- a) Login to the CUCM admin page
- b) Open User Management/Application User
